

SWETANK PANDEY

Data & Business Analytics Intern | Aspiring Data Analyst

Delhi, India | +91 9555708734 | swetank2020@gmail.com | <https://github.com/Luminex28>

PROFESSIONAL SUMMARY

BBA (Business Analytics) student with hands-on experience in SQL, Power BI, Excel, and R, and current internship experience in data analysis and executive reporting. Combines analytical rigor with technical curiosity, evidenced by independently building and maintaining a custom Linux workstation and a growing GitHub portfolio of SQL and BI projects. Comfortable operating across command-line environments and business/boardroom settings, with a focus on turning raw data into clear, decision-ready insights.

TECHNICAL SKILLS

Analytics & BI: Power BI (dashboards, DAX basics), Advanced Excel (PivotTables, VLOOKUP, dashboards), SQL (data retrieval, joins, aggregations)

Programming: R (data wrangling, visualization), Python (Foundational), QML

Data Visualization: Power BI, Excel dashboards, Manim (Python data animation, in progress)

Tools & Version Control: Git, GitHub, command-line tooling

Operating Systems: Windows, Linux (Arch Linux, custom-built), macOS

EXPERIENCE

Data Analytics Intern — The Indus Group

1/6/2026 – 31/7/2026

MSME & trade support firm across Logistics, Enterprise, and Skill Development Solutions

- Analyzed company and client websites across three business verticals to evaluate digital presence, structure, and content, supporting internal strategy reviews
- Designed and built consulting-style, boardroom-ready PowerPoint presentations for company management using structured, brand-consistent card-based layouts
- Authored accompanying speaker scripts to support clear, confident delivery of management presentations

PROJECTS

Custom Arch Linux + Hyprland Workstation

Personal Project, 2025

- Problem: needed a fully customized, high-performance Linux desktop environment optimized for daily technical work
- Built a complete Linux workstation from scratch using Arch Linux and the Hyprland (Wayland) window manager, configuring system components, window management, and workflow tooling end to end
- Authored and version-controlled personal dotfiles and configuration scripts on GitHub, referencing official documentation (Arch Wiki) and community configurations
- Tools: Arch Linux, Hyprland, Git/GitHub, shell scripting | Skills demonstrated: Linux administration, automation, technical troubleshooting, documentation literacy
- Outcome: fully functional, actively used daily-driver workstation with a maintained, publicly version-controlled configuration

Quickshell Application Launcher — Hyprland/Omarchy | (<https://github.com/Luminex28/Lumin.git>)

Personal Project, 2025–2026

- Problem: stock application launchers lacked a fast, visually cohesive way to search and launch apps within a custom Hyprland desktop
- Built a Spotlight-style launcher in QML/Quickshell featuring fuzzy search, a 3D cover-flow interface, full keyboard navigation, and running-application detection
- Integrated the launcher with Hyprland's window manager, including special-workspace navigation and uwsn-based app launching
- Tools: QML, Quickshell, Hyprland/Wayland APIs | Skills demonstrated: UI/UX design, event-driven programming, systems integration, independent scoping and delivery of a multi-stage build

EDUCATION

Bachelor of Business Administration — Business Analytics

2025 – 2029

KR Mangalam University, Gurugram, Haryana | Currently in 3rd Semester |

Professional Development

- Self-directed Python via freeCodeCamp and MIT OpenCourseWare; exploring Manim for data visualization
- Building a public GitHub portfolio of SQL queries, Power BI dashboard and Personal Linux Configuration Files
